PROFESSIONAL SUMMARY

Detail-oriented Mechatronics Engineering student and Frontend Developer with hands-on experience building web interfaces using HTML, CSS, JavaScript, and Bootstrap, as well as practical engineering experience in solar system installation and maintenance. Assisted with 10+ solar power system installations, gaining experience in equipment testing, troubleshooting, technical documentation, and safe collaboration within an engineering team.

Strong analytical and problem-solving abilities with an interest in Artificial Intelligence, Machine Learning, automation, and AI data workflows. Currently developing Python skills through freeCodeCamp and building practical software projects. Seeking remote opportunities in AI data annotation, search relevance evaluation, data collection, AI evaluation, web research, and other technology-related roles that require accuracy, technical aptitude, and attention to detail.

CORE SKILLS

Technical & Digital Skills

- ❖ HTML5
- ❖ CSS3
- ❖ JavaScript
- ❖ Bootstrap
- ❖ Responsive Web Design
- ❖ Git & GitHub
- ❖ Visual Studio Code
- ❖ Vite
- ❖ Web Development

AI & Data-Related Skills

- ❖ Web Research
- ❖ Internet Research
- ❖ Data Accuracy & Validation
- ❖ Data Entry
- ❖ Information Review
- ❖ Technical Documentation
- ❖ Following Detailed Guidelines

- ❖ Quality Checking
- ❖ Analytical Thinking
- ❖ Problem Solving

Engineering Skills

- ❖ Solar System Installation
- ❖ Solar System Maintenance
- ❖ Solar Panels
- ❖ Solar Inverters
- ❖ Batteries
- ❖ Charge Controllers
- ❖ Electrical Connections
- ❖ Equipment Testing
- ❖ Technical Troubleshooting
- ❖ Safety Procedures

Professional Skills

- ❖ Attention to Detail
- ❖ Written Communication
- ❖ Time Management
- ❖ Independent Work
- ❖ Team Collaboration
- ❖ Adaptability
- ❖ Continuous Learning

Currently Learning

- ❖ Python
- ❖ Artificial Intelligence Fundamentals
- ❖ Machine Learning Fundamentals
- ❖ Automation

PROFESSIONAL EXPERIENCE

SIWES Intern — Solar Systems Installation & Maintenance

JRB Solar Investments Limited, Nigeria
2025 – 2026

- ❖ Assisted with 10+ solar power system installations, supporting equipment setup, electrical connections, testing, and system commissioning under supervision.
- ❖ Gained practical experience working with solar panels, batteries, inverters, charge controllers, and related system components.
- ❖ Assisted with equipment inspection, routine maintenance, and troubleshooting of solar power systems.
- ❖ Recorded technical activities, installation procedures, observations, and maintenance information accurately.

- ❖ Followed established safety procedures and technical instructions when handling electrical and solar equipment.
 - ❖ Collaborated with engineers and technicians during field assignments and installation activities.
 - ❖ Developed practical problem-solving, technical documentation, quality-checking, and attention-to-detail skills through hands-on engineering work.
-

SELECTED PROJECTS

SolarSense AI

Technologies used: JavaScript, HTML, CSS, Vite, Git, GitHub

- ❖ In progress, developing a web application focused on helping users understand and estimate solar power requirements.
- ❖ Combined frontend development with an interest in artificial intelligence and renewable energy technology.
- ❖ Designed and implemented a user-focused interface with emphasis on usability, responsive design, and clear presentation of technical information.
- ❖ Used Git and GitHub for version control and project development.

GitHub: <https://github.com/micdynas/solarsense-ai>

PERSONAL PORTFOLIO WEBSITE

Technologies: HTML5, CSS3, JavaScript, Bootstrap, Git, GitHub

- ❖ Designed and developed a responsive personal portfolio website to showcase technical skills, engineering experience, and software projects.
- ❖ Implemented responsive layouts and interactive user-interface elements using HTML, CSS, and JavaScript.
- ❖ Created dedicated sections for professional experience, projects, skills, and contact information.
- ❖ Applied frontend development and UI/UX principles to create a clean and user-friendly experience.
- ❖ Managed the project using Git and GitHub.

GitHub: <https://github.com/micdynas/portfolio-website>

FRONTEND DEVELOPMENT PROJECTS

- ❖ **Technologies:** HTML5, CSS3, JavaScript
- ❖ Completed 4+ frontend development projects involving responsive layouts, UI components, and interactive web interfaces.
- ❖ Translated design concepts into functional web pages using semantic HTML and modern CSS techniques.
- ❖ Practiced responsive design, debugging, interface refinement, and cross-device usability.
- ❖ Continuously improved projects through experimentation, research, and iterative development.

EDUCATION

Bachelor of Engineering (B.Eng.) — Mechatronics Engineering

Federal University of Technology, Owerri (FUTO), Nigeria

Relevant Areas of Study:

- ❖ Programming Fundamentals
 - ❖ Sensors and Instrumentation
 - ❖ Digital Electronics
 - ❖ Control Systems
 - ❖ Embedded Systems
 - ❖ Robotics
 - ❖ Electrical and Electronic Systems
 - ❖ Automation
-

PROFESSIONAL DEVELOPMENT

Python Programming

freeCodeCamp — In Progress

Currently developing foundational Python programming skills through practical exercises and coursework as part of a broader transition toward Artificial Intelligence, Machine Learning, and automation.

Artificial Intelligence & Machine Learning

Self-Directed Learning — In Progress

Developing foundational knowledge of Artificial Intelligence, Machine Learning, AI applications, and automation through structured learning and practical projects.

ADDITIONAL INFORMATION

Languages

- ❖ English — Professional Proficiency

Work Preferences

- ❖ Remote
- ❖ Freelance
- ❖ Contract
- ❖ Project-Based

Areas of Interest

- ❖ Artificial Intelligence
- ❖ Machine Learning
- ❖ AI Data & Evaluation
- ❖ Automation
- ❖ Frontend Development
- ❖ Renewable Energy Technology
- ❖ Engineering Technology
